# OUTSTANDING SIRES

The 2022 sale team demonstrates our continuing commitment to breeding sheep that

## 'put meat into the meat business'.

The 2022 team shows leading edge genetics and depth of breeding. We have put together a sire group where muscling is virtually double the average of all breeds of Australian meat sheep, with exceptional yielding carcasses and leading Lean Meat Yield values, while retaining excellent growth rates and moderate birth weights.

In recent years we have met the challenges of new technological traits developed by Lambplan and have increased our focus on eating qualities. Our breeding values have responded accordingly. Most of our rams are multiple National Trait Leaders for individual measured characters and/or the key indexes.
